Airport Hamburg

Project	Client	Product	Volume of order / €	Year
Airport Hamburg	Flughafen Hamburg GmbH	Fire protection Bulkhead Systems, Encasings	5.000	2002-2003
Airport Hamburg	Flughafen Hamburg GmbH	Join sealing	50.000	2004
Airport Hamburg	Flughafen Hamburg GmbH	Fire Protection Mortar Bulkhead	8.000	2004
Airport Hamburg	Flughafen Hamburg GmbH	Fire protection Bulkhead Systems, Join sealing	180.000	2005-2006

Penetration sealings for the airport Hamburg 2005-2006

350 Mio. EUR will be invested in the airport Hamburg to make the grade of the future. By the year 2008 a new terminal, several new parking sites, a shopping plaza, a connection to the interurban train and as an additional attraction a hotel will be erected on the airport area. The whole passenger check-in should be concentrated on only two terminals. The airport Hamburg is becoming one of the most modern and customer-friendly airports in Europe.

Within the new terminal amongst others 45.000 m² concrete and about 5.800 t steel were used and a gross floor area of curtly 60.000 m² was generated.

For such a big building surface and the high volume of passengers and employees the passive fire protection is indispensable.

The company svt System-Service Hamburg GmbH has obtained the order for fire protection works within the new terminal. Soft penetration sealings, mortar penetration sealings and fire protection joint sealings were installed by dint of the approved PYRO-SAFE systems.

Due to the fast and competent processing of orders diverse follow-up orders were placed to svt by the Flughafen Hamburg GmbH.

Airport Munich

Project	Client	Product	Volume of order / €	Year
Franz-Josef-Strauß-Airport Munich / T1	FMG Munich	Fire protection Bulkhead Systems, Encasings	2.600.000	1988-1992
